Dear Sir / Madam,

The Hungarian Software Testing Board Association, acting as exclusive Hungarian member organization of the International Software Testing Qualifications Board (ISTQB), has enabled thousands of mostly young Hungarian IT professionals to become qualified according to the world's leading international methodology. In addition to supporting quality education and examinations, the main goal of our association is to promote the domestic acceptance of software testing as a critical activity and profession in terms of software quality, and build a software testing community. To achieve this goal, we regularly organize international conferences, as well as professional meetings, workshops and meetups throughout the country.

The Hungarian Testing Board, HTB for short, will hold its own international conference, the Hungarian Software Testing Forum (https://www.hustef.hu/) in 2021 for the eleventh time. This year, the conference will be held online. True to the traditions of previous years, for HUSTEF 2021 we have again thought of the students studying in the fields of software quality and software testing in the faculties of informatics in Hungary. In 2021, thanks to our sponsors, **we will provide free participation for students in the conference and, uniquely, in tutorials as well**. The condition for application is the presentation of a valid student ID. The conference will take place on October 18-21, 2021.

You can read about the **detailed program** of the conference here**:**
https://hustef.hu/programme-schedule-2021/

We hope that with this opportunity we can help students active in higher education institutions in the field of software quality and software testing to enter the “international bloodstream” and expand their knowledge at high-quality international conferences.

If you would like to take this opportunity, please register with our colleague Szilvia Szalai at szilvia.szalai@hstqb.org by 11 October 2021. Some tutorials are subject to a headcount limit, so it's a good idea to register as soon as possible.

In case of any questions, we are happy to help you!

In the hope of further successful cooperation,

Tibor Csöndes
Head of HUSTEF
President of Hungarian Testing Board
